

Samuel Zambrana González

Full Stack Web Developer & Specialist Blockchain Web3

Work Experience

Full Stack Blockchain Web3

**Project Avocate: Full-time | August
2024 - Present | Spain | Remote**

- Avocate is a Blockchain project whose ultimate goal is to support, assist, and care for avocado workers, producers, and associations around the world, while protecting the environment. Avocate will maintain a record of each donation so that it is publicly visible.
- In this project, we will develop a DAO, a DApp and, at the same time, a web interface where clients, collaborators, distributors, etc., will interact, depending on the role of each person or company.
- We will use Blockchain technology and implement this project on different networks such as Polygon, Solana, Ethereum, and others.
- Technologies:
- Solidity, Foundry, Polygon, React, TypeScript, Next, Ether.js, Wagmi, Rainbow SDK and ERC20. RWA for now!

Education

**CodeSpace Academy | January 2025 - September
2025 | Professional Full Stack Web + Mobile App
Development: 17th Edition Front-End**

- and Frameworks: Developing dynamic and interactive web pages using HTML, CSS, JavaScript, React, Angular, and Vue.js.
- Back-End and Blockchain: Creating scalable applications with Node.js, Express.js, and REST
- APIs Databases: MongoDB and SQL, integrating them

**Keepcoding | July 2013 – August 2024 | Full Stack
Blockchain and Cryptoassets Bootcamp**

- Design security architectures and protocols in Blockchain networks.
- Create smart contracts and decentralized applications (DApps) in languages like Solidity and JavaScript.
- Integrate Blockchain applications with existing enterprise systems.

About me

As a passionate **Blockchain Web3** and web development enthusiast, I decided to expand my knowledge in this field to pursue my professional career as a Blockchain Developer with great dedication, enthusiasm, and drive. I took the Blockchain and Cryptoassets Bootcamp to become a professional.

Tools and Framework

- **IDEs:** Visual Studio Code, Remix, Anchor, Jupyter Notebook.
- **Operating Systems:** Linux, Windows, macOS.
- **Command Terminal:** Bash, WSL or Linux terminal.
- **Version Control:** Git, GitHub, GitLab.
- **SDKs:** Hardhat, Foundry, Anchor, Remix., Vite **Front-End:**
- HTML5, CSS3, JavaScript, React, Bootstrap, Sass, Redux, Tailwind, Axios.
- **Back-End:** Node.js, Python, Rust, Solidity, MySQL, Docker.
- **Blockchain:** DApps, Smart Contracts, DAOs, **Portfolio** Arbitrum, Solana, **DeFi**, Ethereum, Polygon,

Skills

- Solving complex problems
- Critical thinking
- Teamwork
- Adaptability and rapid learning
- Communication skills and efficiency
